

## Meritor Parts

The Meritor Business is a leading international supplier established upon 100 years of custom of quality and service. Meritor focuses on integrated systems together with several modules and [forklift parts](#) to the original machine manufacturers and aftermarket equipment in the industrial and transportation trades.

Meritor values the wishes of their clients to guarantee their success while priding itself in the company's unique energy and feels this output of energy to be their competitive advantage in their global operations. Meritor starts with a culture that values diversity of individuals and their broad thought processes. Operating in 19 countries and hiring over 11,200 people, Meritor promotes collaboration and innovation among a team of experienced professionals.

By only employing future focused workers, Meritor strongly believes these top-caliber people would be able to rapidly adapt to changing surroundings and demonstrate the commitment and performance required in order to reach results in the competitive materials handling market. The company empowers their teams to make sound business decisions to be able to improve the overall success of the business. In return, Meritor offers all of their staff various chances for professional and personal growth.

Their Advanced Engineering team is at the forefront of parts and system engineering which comprise drivelines, axles, braking and suspension systems meant for heavy duty and medium trucks, military vehicles, trailers, off-highway vehicles and buses. The Meritor Advanced Engineering team is growing. They launched a new technical center in Bangalore, India in September 2009 to be able to lead their advanced product development initiatives which represent the entire Asia Pacific region. This particular team is even responsible for supporting the needs of all their international engineering personnel.

The Quality team at Meritor is a dynamic and customer-focused group who is devoted to ensuring optimum growth at their production plants and aftermarket distribution facilities which are located on 5 continents and in 19 nations.

They have their supplier network which is specially located so as to support the development of the business. Each regional team has internationally supported initiatives, quality systems and centralized in Six Sigma and Materials Engineering. Meritor's growing Six Sigma program promotes a fact-based, data-driven method to decision making within every part of the company. The DFSS or likewise referred to as Design for Six Sigma ensures product reliability in every region. The team is even included transactional Green Belts who use Six Sigma tools to business techniques and apply lean methods.
