

Carton Clamp Attachments

One of the more versatile additional parts used for the forklift is the Carton Clamp. It is meant for handling numerous items unsecured on a pallet like for instance furniture, appliances, canned goods or frozen cartons. Large rubber-faced pads are used to squeeze the side of the load very gently. The load is then carefully lifted and transported to either the trailer or the warehouse. Carton Clamps were specifically designed to be used in the electronics, beverage, appliance and warehousing industries. Businesses that use these clamps actually save plenty of money because they don't have to obtain, ship, maintain or store pallets. [Clark parts](#) carton clamps allow for pallet free handling, significantly saving warehouse room.

Typical features on all Carton Clamps, side-shifting allows for a more accurate alignment to be attained all through the position of the load. Pivoting aluminum pads and a slim arm design allows for close piling of the load to be maintained. The close stacking eliminates unwanted spaces amid rows of stock plus more space is gained because all of the expensive pallets are likewise eliminated.
